Allen Diaz

Senior Full Stack Developer @ Philtech | Software Engineer | AI
Engineer
Metro Manila

Summary

Senior Full Stack Developer with 3+ years of experience in designing and developing scalable web applications and AI-driven solutions. Highly skilled in React, Next.js, FastAPI, and Express, with a proven track record of delivering enterprise-grade architectures and innovative digital products. Currently contributing to AI-powered systems at Albertsons Companies, blending full-stack development with machine learning to optimize business processes. Certified by IBM, Meta, and Microsoft, and with published research in IEEE Xplore. Passionate about continuous learning, emerging technologies, and building impactful solutions that drive efficiency and user satisfaction

Experience

Philtech Inc.
2 years 1 month

Senior Full Stack Developer / AI Engineer
April 2026 - Present (6 months)
Taguig

- Developed AI-powered voice bots for Albertsons' Contact Center using Google CCAI, supporting customer interactions across 2,200+ stores and transforming rule-based workflows into conversational AI experiences.
- Leveraged Claude and other LLMs for prompt engineering, solution design, code generation, debugging, and documentation, accelerating development and improving delivery efficiency.
- Modernizing Albertsons' internal employee platform through migration to Next.js and TypeScript, improving scalability, maintainability, and performance.
- Designed and developed APIs and backend services powering voice automation systems and enterprise applications, enabling seamless integrations and reliable operations.

Full Stack Developer / AI Engineer
June 2025 - April 2026 (11 months)

Taguig

- Worked for the AI Team INCITE (Innovation & Continuous Improvement Team).
- Led the Full Stack AI system project for Philtech Finance; the project is a Document Analyzer and Reviewer
- Built the UI from scratch using the Next.js framework. The frontend includes Tailwind CSS and TypeScript. The UI features an Analytics Page, Invoice Page, and four workflow pages.
- Developed 14 backend endpoints from scratch using the Python FastAPI framework . The backend includes SQLAlchemy ORM, Pydantic, Cloud SQL (PostgreSQL) database, Google Cloud Storage, and more.
- Used Docker for containerization and created Docker workflows for both frontend and backend.
- Deployed the system on Google Cloud Platform (GCP).

Software Engineer

September 2024 - June 2025 (10 months)

Taguig

- *Fixing system issues
- *Investigating problems using Cloud, database, logs and etc
- *NodeJS project involvement
- *Using Linux, Unix and shell scripting for POS issues through ServiceNow platform
- *Handling and troubleshoot if there's a problem with the technology of Albertsons companies Retail which consist of 2200 stores
- * Create a query runbook documentation (MongoDB and Azure technology)
- *Continuous learning through 1 on 1 training and self-study using myACI website(Albertsons Learning Platform)
- *Training (1.5 months) Tech Skills: Java, Python, AI, Linux, Shell scripting, PowerBI, Database management, Data Analytics, Google Cloud, Azure Cloud, GitHub, GitHub Copilot
- Professional Skills: High-Impact Business Writing, Creative and Critical Thinking
- *Developed Expense Tracker

Self-Employed

Full Stack Developer

August 2022 - September 2024 (2 years 2 months)

Philippines
